Education

University of North Texas, MS in Artificial Intelligence — August 2024 – May 2026
- **Coursework:** Machine Learning, Deep Learning, NLP, Data Mining, Data Visualization

GPA: 3.6/4.0

Ganpat University, B.Tech in Computer Engineering (AI & ML specialization) — August 2020 – May 2024
- **Coursework:** Machine Learning, Computational Data Analytics, Data Structures, NLP, Computer Networks, Big Data, Database Management

GPA: 8.32/10.0

Experience

Project Research Assistant, *Defence Research and Development Laboratory, Hyderabad, India* — January 2024 – May 2024
- Conducted research on **Threat Evaluation and Resource Allocation**, contributing to national defense strategies.
- Developed **predictive models** to assess potential threats, improving resource allocation efficiency by 20%.
- Implemented **data-driven insights** to enhance decision-making in real-time threat assessment.
- Collaborated with a **cross-functional team** of AI researchers and defense strategists to refine algorithms for optimal performance.

Projects

Speech Emotion Recognizer — Speech-Emotion-Recognizer
- Designed and developed a **speech emotion recognition system** using **CNNs and RNNs**, achieving **85%+ accuracy** in emotion classification.
- Processed over **10,000 audio samples**, extracting key acoustic features using advanced **signal processing techniques**.
- Deployed the model using **Streamlit**, allowing real-time emotion detection from speech inputs.
- Optimized model performance by fine-tuning **hyperparameters** and leveraging **data augmentation** techniques.

Spam Mail Detection — Spam-Mail-Detection
- Built a **spam classification system** leveraging **Naïve Bayes, CNN, and SVM algorithms**, achieving **over 95% accuracy** in spam detection.
- Analyzed **large-scale email datasets**, extracting linguistic and metadata features to improve model efficiency.
- Integrated the model into a **Flask web application**, enabling users to classify emails in real time.
- Visualized classification results using **Power BI**, providing insightful dashboards for better understanding of spam trends.

Technical Skills

Programming: Python, C, R
Core Concepts: Generative AI, Large Language Models, Machine Learning, Deep Learning, Data Analytics, Statistical Modeling, Cloud Computing, Computer Networks
Develpoer Tools: Git, Jupyter Notebook, VS Code, PyCharm, Tableau, Power BI
Web Technologies: HTML, CSS, JavaScript, Flask, Django
Query Languages: SQL, NoSQL

Certifications

- Generative AI with Large Language Models – DeepLearning.AI
- Microsoft Certified: Azure AI Engineer Associate – Microsoft
